REACH declaration

Dear Sir or Madam,

REACH, the European Community regulation on chemicals and their safe use ((EC) no. 1907/2006), came into force on 01st June 2007. When EChA, the European Chemicals Agency, published the SVHC (Substances of Very High Concern) list on 28.10.2008, the requirement for trading companies to provide consumers, on request, with information about such substances in products in accordance with article 33 of REACH came into effect.

We herewith confirm that Xella Trockenbau-Systeme GmbH has met all the obligations under REACH concerning the registration, evaluation, approval and restriction of chemical substances.

Furthermore we confirm that, based on the information available to us at present, neither our products nor their packaging contain any substances deemed to be substances of very high concern (SVHC) as defined by REACH (based on the current SHVC list).

We will be monitoring future updates of the SVHC list in this regard. We will notify you immediately if any substances contained in the products of Xella Trockenbau-Systeme or their packaging are incorporated in the list.

Yours sincerely,

Xella Trockenbau-Systeme GmbH

Christoph Dorn
